

PTH

Container House Project in Malaysia

- 1. Project No. : PT190133**
- 2. Date : year 2019**
- 3. Location: Malaysia**
- 4. Scale: 3 sets detachable container house combination**
- 5. Category: Container house**
- 6. Function : holiday room**
- 7. Characteristics : located in rainy and humid areas, with excellent waterproof and anti-corrosion performance**

PROJECT DESIGN

PTH owns 100+ architect and engineers at home and abroad, to provide customized design service for client with different requirements. We use the relevant information data of construction projects as the basis of the model to build the building model, and simulate the real information of the building through digital information simulation.

At present, we have finished the Revit research and development of company' s products, laying a solid foundation to finish design effectively and accurately and also presenting details and three dimensional effects of our company' s products to customers.

Project Features:

The project is a forest holiday house. In order to meet the lighting conditions, the design of large glass doors and windows is adopted.

Secondly, because the house is built in the forest, the traffic is not particularly convenient, so we use detachable container system, and each component is packed in small pallets to facilitate the transportation and installation of customers;

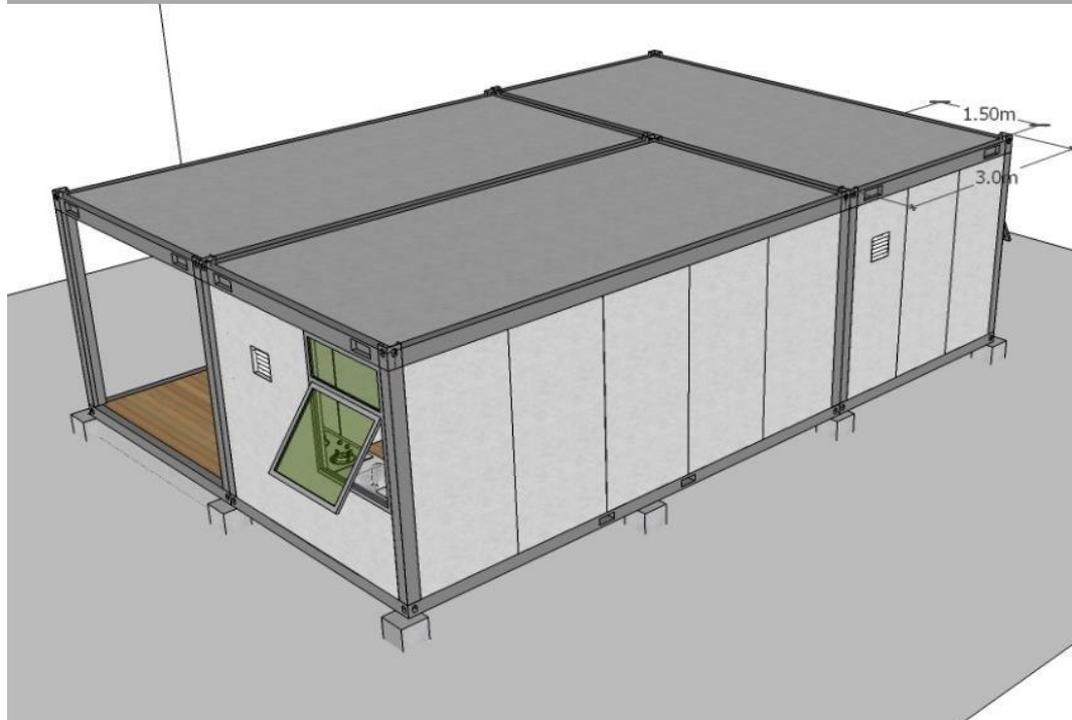

In order to adapt to the rainy and humid climate of the forest, all the frames and panels are galvanized and spray-painted, which has good corrosion resistance. At the same time, the bottom adopts an overhead design, and the practicality of the entire building is greatly increased.

DESIGN

Design drawing is provided by client. The preliminary design is made in accordance to client' s requirement and local building code. After getting the permission by local authority, PTH will do the shop drawing for production.

DESIGN

PRODUCTION & DELIVERY

PROCUREMENT :

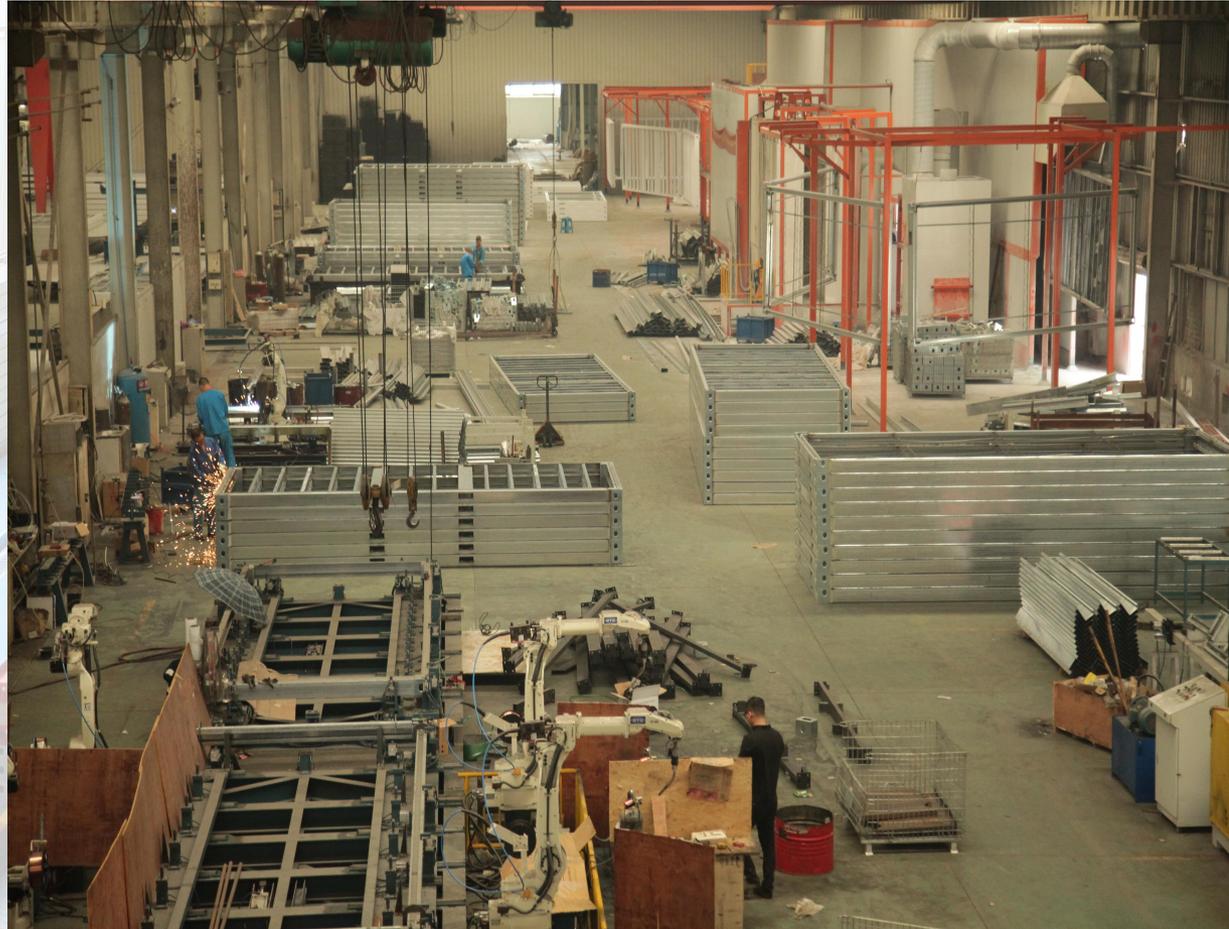

PTH has a mature procurement supply chain, including product raw materials, kitchen and bathroom accessories, home equipment and other supporting facilities. Each year, PTH conducts quality assessments of suppliers, resolutely rejects unqualified suppliers, and guarantees the quality of products from the source.

PRODUCTION :

PTH owns hundreds of fully automatic mechanized production lines, which ensures high production efficiency and timely delivery. In the manufacturing process, PTH can provide production progress reports to customers through pictures and video. PTH has a professional quality inspection team which takes strict quality control in each process, and make sure defect product never be delivered to client.

TRANSPORTATION :

PTH, who has more than 20 years of international logistics experience. can provide customers with the best transportation routes, customs declaration, commodity inspection and other services, and truly realizes "door to door."

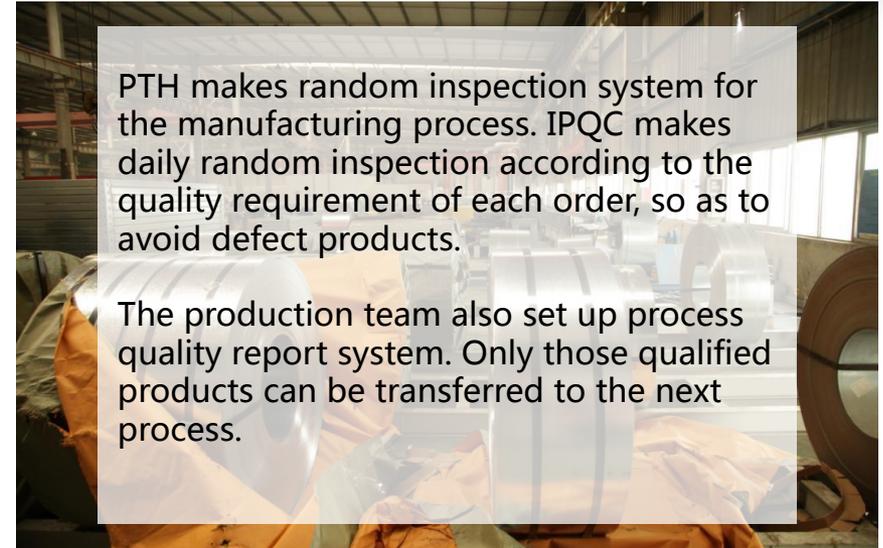

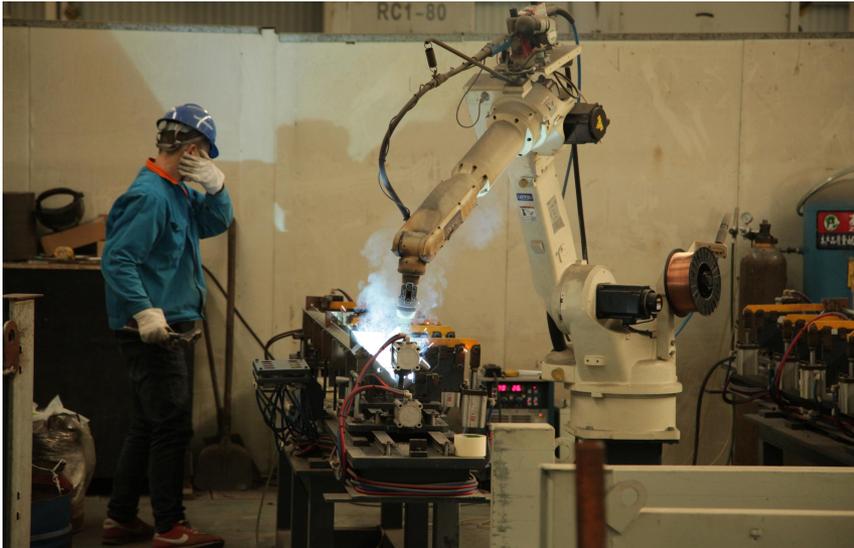

PRODUCTION PICTURES

Quality is the life of an enterprise and the foundation of sustainable development. PTH strictly follows the ISO9000 quality system and makes quality control in each process from material procurement to finished product delivery.

For the outsourcing of raw materials and accessories, it is reported to the ICQC team for inspection. ICQC will inspect according to "Raw Material Inspection Regulations", ensure the material technical specifications and quality meet GB standards, then upload the inspection record, QC document and test report to the ERP system.

PRODUCTION PICTURES

PTH makes random inspection system for the manufacturing process. IPQC makes daily random inspection according to the quality requirement of each order, so as to avoid defect products.

The production team also set up process quality report system. Only those qualified products can be transferred to the next process.

PACKAGE & LOADING

PTH makes the most reasonable package plan according to the structure characteristics and quality requirement. The modular package design of the spare part effectively reduce the package volume. The spare parts of each module is packed in a separate package, these small package modular combination ensures a easy transportation and installation, which in return makes the loading and unloading much easier, and greatly reduces labor cost.

INSTALLATION

PTH will provide complete and detailed installation drawings for the product. PTH has professional photography and post-production personnel who can provide installation videos for the product and intuitively demonstrate the installation steps and installation details of the product.

PTH owns on-site installation guidance experience for dozens of projects such as Mozambican light steel villa resorts, Chilean container camps, etc. It can provide EPC construction services and technical guidance according to the needs of customers to ensure the smooth and safe construction of the houses required by customers and realize real "Check-in".

INSTALLATION

CLIENT FEEDBACK

We use BIM system to manage and operate the whole project. For the maintenance, PTH provide online technical support or maintenance service on the site per client requirement.

Its design, functionality and practicality meet the basic needs of customers, and the living comfort is also very high. This house is very popular in the local area.

CLIENT FEEDBACK
