## Light steel Villa in New Caledonia

1. Project No. : PT130246
2. Project Date : Year 2013
3. Location : New Caledonia
4. Scale : 150m<sup>2</sup>
5. Category : light steel villa
6. Function : Residential
7. Characteristics : Medium-to-high-grade light steel villa suitable for family living, strong in earthquake resistance and wind resistance

# PROJECT DESIGN

PTH owns 100+ architect and engineers at home and abroad, to provide customized design service for client with different requirements. We use the relevant information data of construction projects as the basis of the model to build the building model, and simulate the real information of the building through digital information simulation.

At present, we have finished the Revit research and development of company's products, laying a solid foundation to finish design effectively and accurately and also presenting details and three dimensional effects of our company's products to customers.

## Project characteristics :

The total area of the project is 150 square meters. The double-sloping roof includes a corridor, a total of three bedrooms, two toilets, a living room, a kitchen and an outdoor corridor.

After the customer visited the PTH factory, he was very interested in the light steel model room of 40 square meters, and asked the salesman a lot of related questions. Due to the relatively high wind speed in the area where the customer is located, the service life of the mobile home is not long, and the PTH light steel villa is not only strong in wind resistance, but the interior decoration can also be configured according to individual needs, so it is very in line with customer needs.

## DESIGN

The preliminary design is made in accordance to client' s requirement and local building code. After getting the permission by local authority, PTH will do the shop drawing for production.

# PRODUCTION & DELIVERY

## PROCUREMENT :

PTH has a mature procurement supply chain, including product raw materials, kitchen and bathroom accessories, home equipment and other supporting facilities. Each year, PTH conducts quality assessments of suppliers, resolutely rejects unqualified suppliers, and guarantees the quality of products from the source.

## PRODUCTION :

PTH owns hundreds of fully automatic mechanized production lines, which ensures high production efficiency and timely delivery. In the manufacturing process, PTH can provide production progress reports to customers through pictures and video. PTH has a professional quality inspection team which takes strict quality control in each process, and make sure defect product never be delivered to client.

## TRANSPORTATION :

PTH, who has more than 20 years of international logistics experience. can provide customers with the best transportation routes, customs declaration, commodity inspection and other services, and truly realizes "door to door."

# PRODUCTION PICTURES

Quality is the life of a enterprise and the foundation of sustainable development. PTH strictly follows the ISO9000 quality system and make quality control in each process from material procurement to finish product delivery.

For the outsourcing raw material and accessories, it is reported to the ICQC team for inspection. ICQC will inspect according to "Raw Material Inspection Regulations" , make sure the material technical specs and quality meets GB standard, then upload the inspection record, QC document and test report to ERP system.

# PRODUCTION PICTURES

PTH makes random inspection system for the manufacturing process. IPQC makes daily random inspection according to the quality requirement of each order, so as to avoid defect products.

The production team also set up process quality report system. Only those qualified products can be transferred to the next process.

## PACKAGE & LOADING

PTH designs reasonable packaging solutions based on product structure characteristics/customer quality requirements. A total of one 40ft high cabinet and one 20ft flat cabinet are used to transport the project. PTH makes the most reasonable package plan according to the structure characteristics and quality requirement. The modular package design of the spare part effectively reduce the package volume. The spare parts of each module is packed in a separate package, these small package modular combination ensures a easy transportation and installation, which in return makes the loading and unloading much easier, and greatly reduces labor cost.

# INSTALLATION

PTH will provide complete and detailed installation drawings for the product. PTH has professional photography and post-production personnel who can provide installation videos for the product and intuitively demonstrate the installation steps and installation details of the product.

PTH owns on-site installation guidance experience for dozens of projects such as Mozambican light steel villa resorts, Chilean container camps, etc. It can provide EPC construction services and technical guidance according to the needs of customers to ensure the smooth and safe construction of the houses required by customers and realize real "Check-in".
