

# Slovakia steel structure workshop

1.Project No. : PTM2W189

2.Date: 2015年

3. Location :Slovakia

4. Scale: 2 warehouses,

each 3780 m<sup>2</sup>

5. Category: Steel

structure

6. Function: warehouse

7. Characteristics:
Detailed planning and design of storage, transportation, operation and other functions in the design

## **PROJECT DESIGN**

5442

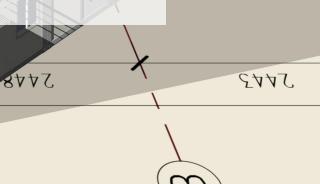

S

PTH owns 100+ architect and engineers at home and abroad, to provide customized design service for client with different requirements. We use the relevant information data of construction projects as the basis of the model to build the building model, and simulate the real information of the building through digital information simulation.

At present, we have finished the Revit research and development of company's product s, laying a solid foundation to finish design effectively and accurately and also presenting details and three dimensional effects of our company's products to customers.

Project characteristics: This is a steel structure product used as a processing workshop, with a size of 82m\*42m\*8m, a mezzanine for office, a crane, and a roof lighting zone.

In the design, the functions of warehousing, transportation and operation are well planned. For the installation knowledge of the foundation, we provide detailed foundation installation drawings. Two layers of paint are painted on the steel beam to enhance the anti-rust function.

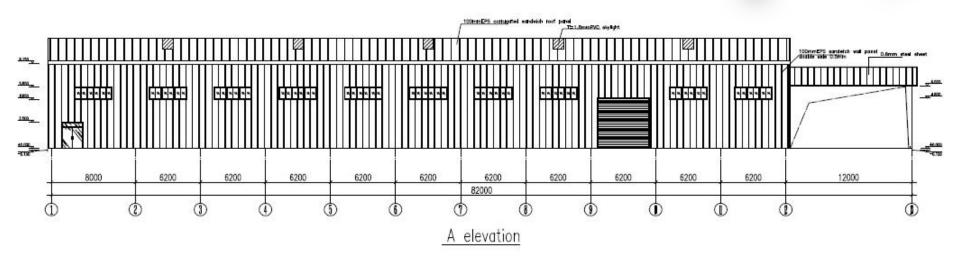

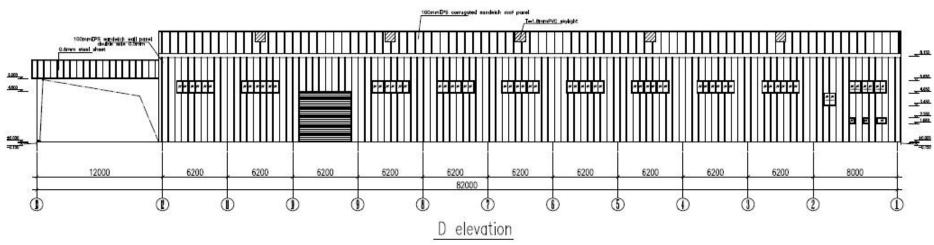

The preliminary design is made in accordance to client's requirement and local building code. After getting the permission by local authority, PTH will do the shop drawing for production.

## **PRODUCTION & DELIVERY**

# PTH.

#### PROCUREMENT:

PTH has a mature procurement supply chain, including product raw materials, kitchen and bathroom accessories, home equipment and other supporting facilities. Each year, PTH conducts quality assessments of suppliers, resolutely rejects unqualified suppliers, and guarantees the quality of products from the source.

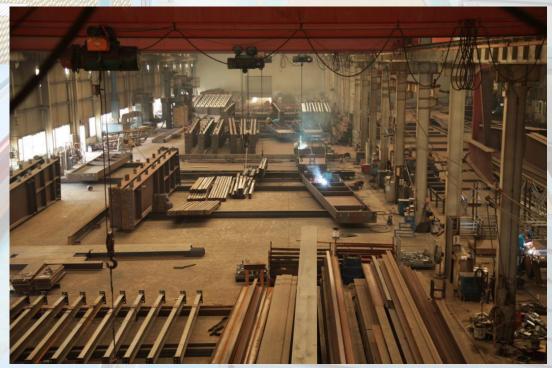

#### PRODUCTION:

PTH owns hundreds of fully automatic mechanized production lines, which ensures high production efficiency and timely delivery. In the manufacturing process, PTH can provide production progress reports to customers through pictures and video. PTH has a professional quality inspection team which takes strict quality control in each process, and make sure defect product never be delivered to client.

#### TRANSPORTATION:

PTH, who has more than 20 years of international logistics experience. can provide customers with the best transportation routes, customs declaration, commodity inspection and other services, and truly realizes "door to door."

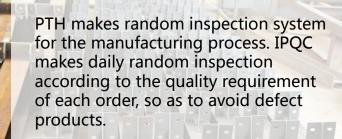

## **PRODUCTION PICTURES**

The production team also set up process quality report system. Only those qualified products can be transferred to the next process.

### PACKAGE & LOADING

· PTH.

PTH makes the most reasonable package plan according to the structure characteristics and quality requirement. The modular package design of the spare part effectively reduce the package volume. The spare parts of each module is packed in a separate package, these small package modular combination ensures a easy transportation and installation, which in return makes the loading and unloading much easier, and greatly reduces labor cost.

# **INSTALLATION**

PTH will provide complete and detailed installation drawings for the product. PTH has professional photography and post-production personnel who can provide installation videos for the product and intuitively demonstrate the installation steps and installation details of the product.

PTH owns on-site installation guidance experience for dozens of projects such as Mozambican light steel villa resorts, Chilean container camps, etc. It can provide EPC construction services and technical guidance according to the needs of customers to ensure the smooth and safe construction of the houses required by customers and realize real "Check-in".

# **CLIENT FEEDBACK**

We use BIM system to manage and operate the whole project. For the maintenance, PTH provide online technical support or maintenance service on the site per client requirement.

The customer was introduced by a cooperative client of PTH. The two parties communicate very smoothly, understand each other, and have a certain degree of trust, so the other party is very confident to hand over such a project to PTH.
